Web Development	:HTML, CSS
Database Management	: SQL
Operating Systems	:Windows, Linux
Cybersecurity	:Basic knowledge of data encryption, secure communication methods
Networking	:Understanding of network protocols, basic network troubleshooting
UI Design	:User interface design on Figma

WORK EXPERIENCE

I am a Fresher who is looking for opportunity to work for a reputed company.

PROJECTS

- **Text To Speech Converter** : Designed a Text-to-Speech Converter to efficiently transform text into clear, natural-sounding speech, supporting multiple languages and voice options. This project enhances accessibility and user engagement by enabling customizable audio output across different languages and tones.
- **Online Book Ordering System** : Website that enables users to browse and order books seamlessly. The platform includes unique features such as personalized recommendations, user reviews, and secure payment options to enhance the shopping experience and meet diverse reading preferences.
- **Indoor Navigation Using AR** : Developed an Indoor Navigation System using Augmented Reality (AR) to assist disabled individuals in navigating building interiors. The system provides real-time visual guidance and accessible pathways, enhancing independence and ease of movement within complex indoor spaces.

CERTIFICATIONS/ACHIEVEMENTS

- Cybersecurity Lead @ College Team, Mu Learn (2021-2023)
- Google Arcade Achievement (2024)
- Member of National Service Scheme (2022-2024)
